**PRODUCT BENEFITS**

Asian Paints Acrylic Wall Putty is a water-based, ready-to-use putty meant for filling and smoothing out cracks and dents on the plastered wall or similar interior surfaces.

- **a)** The putty has special acrylic binders that ensure that it retains a strong grip on the wall surface, thereby increasing the life of the paint film.
- **b)** It is made using special equipment and technology that ensure smoothness and consistency.
- **c)** On account of the putty’s exceptional whiteness and smoothness, emulsions painted over the putty will tend to look richer.
- **d)** It also enhances breathability and lesser porosity compared to conventional putty, thus improving paint performance further.
- **e)** It is quick drying, thus ensuring faster completion of jobs.
- **f)** It has better alkali resistance, thus making it more suitable for new walls.
